

MUHAMMAD SIDHAN P

Bengaluru, Karnataka, India

sidhan907@gmail.com | linkedin.com/in/muhammad-sidhan-p-875423380

PROFESSIONAL SUMMARY

BCA student specializing in Artificial Intelligence, Machine Learning, and Robotics with strong programming expertise in Python. Skilled in Python, Django, SQL, and web development. Demonstrates strong problem-solving abilities and a solid foundation in software development, seeking opportunities to apply technical skills in real-world applications.

EDUCATION

Yenepoya University

September 2023 – September 2026

Bachelor of Computer Applications (Final Year) – AI, Machine Learning & Robotics Bengaluru, Karnataka .

Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Data Analytics, Robotics

TECHNICAL SKILLS

- Core Programming Languages : Python, Java, C, JavaScript .
- Frameworks & Libraries / Industrial : Django, Bootstrap, Pandas, NumPy, Scikit-learn.
- Web Development / Industrial : HTML, CSS, JavaScript.
- Data Visualization & Tools : Matplotlib
- Tools : Git, GitHub, VS Code, Jupyter notebook, Pycharm.

CERTIFICATIONS

- Python Internship – Quest Innovative Solutions Pvt. Ltd. (2026)
- TCS iON Applied Industry Project: Developing Security Automation Tools with Python for SOC Operations (2026)
- Microsoft Power BI Data Analyst Specialization – Microsoft Official Certification
- Business Strategy – Strategic business planning and data-driven decision making
- Creative Designing in Power BI – Advanced visualization techniques and interactive dashboard design
- Fake News Detection with Machine Learning – Applied ML for NLP and classification tasks
- Deep Learning – Neural networks, deep learning architectures, and advanced AI applications

KEY PROJECTS & TECHNICAL EXPERIENCE

Quest Innovative Solutions Pvt. Ltd. (Python Intern)

Duration: 2 months

- Completed internship in Python development.
- Contributed to the Global Patient Using QR Code healthcare management project.
- Assisted in developing online appointment and consultation features.
- Worked with QR Code-based patient identification and management systems.
- Enhanced practical skills in Python programming and web application development

Medical Website – Doctor Finder Platform

- Developed a responsive medical website that enables users to search for and view doctor profiles efficiently.
- The platform provides detailed information about doctors, including specialization, experience, and contact details, helping users make informed healthcare decisions.
- Designed multiple interconnected web pages with a clean UI and intuitive navigation to enhance user experience.
- Implemented structured layouts and consistent styling to ensure usability across devices.

Contract Management Platform | Frontend Project

- Built a frontend-only Contract Management Platform with blueprint-based contract creation and reusable templates.
- Implemented a controlled contract lifecycle (Created → Approved → Sent → Signed → Locked) with revocation handling.
- Developed a dashboard with status-based filtering and dynamic action controls.
- Managed application state using JavaScript and browser localStorage for mocked persistence.
- Designed a modular and maintainable code structure with clear separation of UI and business logic.

ADDITIONAL INFORMATION

Areas of Interest : Data Science, Business Intelligence, AI/ML Applications, Strategic Analytics

Currently Learning : Python Django & Flutter

Currently Working : building a E-Commerce app with Python Django
